

ZYAD YHIA ZAKARIA

Full-Stack Software Engineer | React · Laravel · ASP.NET Core

Cairo, Egypt • zyad.yhia.sw@gmail.com • +2 (010) 0240 1163 • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFILE

Full-stack software engineer with 6+ years across product companies, agencies, and embedded systems. Currently building HR products in **React/TypeScript** at JisrHR, with backend depth in **PHP/Laravel** and **C#/ASP.NET Core** (Web API, EF Core, Identity/JWT) gained through freelance and independent projects. Comfortable owning features end-to-end — from requirements and API design to UI, testing, and deployment.

PROFESSIONAL EXPERIENCE

JisrHR | *Software Engineer — React*

Jan 2025 – Present

- Build and maintain the HR module front-end in React/TypeScript, driven by customer requirements and UI/UX designs.
- Integrate the front-end with backend services and contribute to API contract discussions.
- Assist in testing and quality assurance across the application.

Coretech-x | *Full-Stack Developer — Vue.js / Quasar*

Jul 2024 – Jan 2025

- Built front-end applications with Quasar/Vue.js based on customer requirements.
- Handled customer communication, requirements gathering, and environment preparation.
- Assisted in software integration testing across modules.

Method Electronics | *Software Engineer — Embedded C / Testing*

Jul 2023 – Jul 2024

- Developed application-layer and ECU-layer modules to customer and project requirements.
- Wrote and executed unit and software-integration tests using Tessy.

MilkDiamond | *Software Engineer — PHP / Laravel*

Feb 2022 – Jul 2023

- Built an IoT platform ingesting and analysing livestock sensor data to support decision-making.
- Built a farm-management system for controlling animal and dairy production farms.

Pintrue | *Full-Stack Developer — PHP / Laravel*

Jan 2021 – Feb 2022

- Developed ERP modules (accounting, inventory) and refactored legacy code in PHP/Symfony.
- Implemented in-app payments for a gaming product via the Fawry payment gateway.

VTS | *Software Engineer — PHP / C*

Aug 2019 – Jan 2021

- Developed backend scripts and data-collection algorithms for IoT applications.
- Built interfaces for monitoring and controlling device data.

FREELANCE & SELECTED PROJECTS — C# / ASP.NET CORE

Automotive Services Platform | *Freelance Full-Stack Developer — ASP.NET Core*

[dates]

- Built a multi-module platform serving car owners, built on **ASP.NET Core Web API**, **EF Core**, and role-based **Identity/JWT** auth across customer, vendor, and workshop-owner roles.
- **Roadside assistance:** real-time tracking of nearby tow trucks (winches) so drivers stranded on highways can locate and request the closest one.
- **Multi-vendor e-commerce:** marketplace specialised in car spare parts, with vendor storefronts, catalogues, and order management.
- **Workshop management:** customer-facing service booking plus owner tools for managing workshops and multiple branches.
- **Inventory & invoicing:** shared inventory linked to both workshops and the spare-parts marketplace, with an invoicing module for workshop services.

Online Courses & Examination System | *Independent Project — ASP.NET Core*

[dates]

- Built a course-categorisation and **MCQ examination** platform with strict exam integrity: single-attempt enforcement and active-session monitoring that invalidates the attempt if the candidate leaves the exam session.
- Data layer with **EF Core + SQL**; secured with **Identity/JWT** role-based access for admins, instructors, and students.

- Built an order and delivery management system covering order lifecycle, kitchen workflow, and delivery assignment/tracking, on **ASP.NET Core Web API + EF Core**.

TECHNICAL SKILLS

Frontend: React / Next.js, Vue.js / Quasar, TypeScript, JavaScript, Redux / Zustand, React Query, Tailwind, Bootstrap, ShadCN, Sass/SCSS

Backend: PHP / Laravel, C# / ASP.NET Core (Web API, EF Core, Identity/JWT), Go / GORM, Inertia.js, WordPress

Databases: MySQL, SQL Server, PostgreSQL

Tools & Environments: Git / GitHub, Docker, server & cloud deployment, Jira, Mantis, npm / yarn / composer

EDUCATION

B.Sc. Electrical & Communications Engineering

2014 – 2019

Higher Institute of Engineering and Technology, New Damietta

TRAINING & CERTIFICATIONS

- C# / ASP.NET Core — Route Academy (Sept – Dec 2024)
- React — Udemy, Maximilian Schwarzmüller (Jan – Feb 2025)
- Vue.js — Udemy (Jun – Jul 2024) • Angular — Route Academy (2020) • PHP/Laravel — Route Academy (2020)
- Go, Docker & Kubernetes — Udemy • Project Management & Risk Analysis — Coursera/Google

LANGUAGES

Arabic — Native • English — Proficient
